

## BZM SERIES

# CROSS-ENHANCED® Z, MULTI-ENERGY PARCEL BACKSCATTER

## Safer, Speedier, Sharper: A Better Breed of Backscatter

Cross-Enhanced® Z Backscatter Multi-Energy technology combines the most effective elements of ultra-low dose multi-energy and backscatter X-ray technology for rapid, user-friendly automatic threat detection.

The AUTOCLEAR M Series pinpoints hidden organic and composite explosives, drugs and contraband faster, more safely and more accurately than other dual-view systems.

### ▶ APPLICATIONS

Customs and Border Crossings

VIP Screening

Military Bases

Embassies and Consulates

Royal and Diplomatic Protection

Nuclear and Other Power Plants

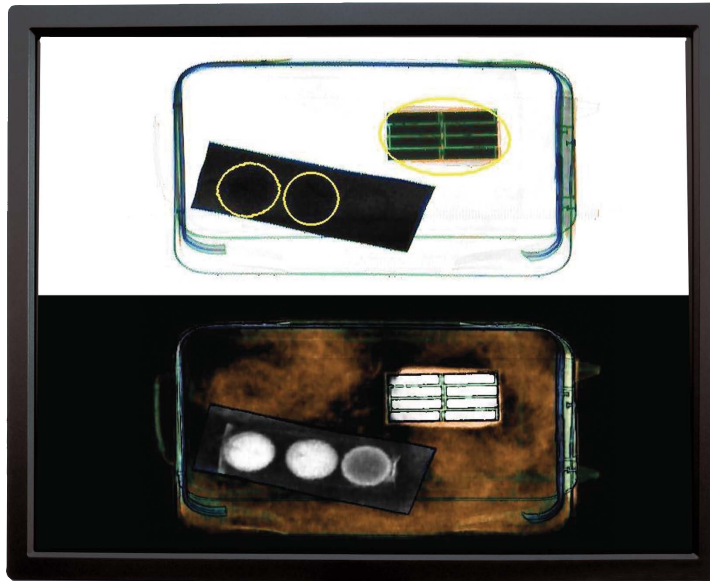

High Security Events

Seaports

Federal Targets and Checkpoints

Postal and Receiving Facilities

Justice and Correctional

Cross-Enhanced® Multi-Energy view with Dual Mode detection penetrates 25% deeper than standard dual-views.

Cross-Enhanced® Z Backscatter view brightly exposes smuggled narcotics (tennis can) and military and home-made explosives hidden behind steel blockants and segmented laptop battery.

A Better Breed of Explosives, Narcotics and Contraband Detection
